### **Program Description**

Our afterschool immersion class provides a total Mandarin environment for children to immerse themselves into Chinese language and culture. With our experienced and native Mandarin-speaking teachers, children will practice their Mandarin speaking, reading, and writing skills through stories, songs, crafts, and group activities. Various teaching methods such as total physical response and child-centered activities are used to create an interactive learning environment for children.

We understand children learn the best by doing; therefore, our program is customized to kindergartener's learning development and characteristics. Children will not only practice their language and math skills in the class time, they will also exercise important moral values such as respect, honesty, responsibility, kindness, and compassion through daily life routine and peer interactions. Our goal is to support children learning the language naturally and helps to build their interests and confidence to become lifelong learners.
